EASY TO USE

NEW FEATURES AND
COMPACT DESIGN

Pressurized system with integrated pressure control

Easy to install and Compact **plug and play** booster set.

Brand new asynchronous single-phase motor.

Equipped with pressure transducer, non-return valve, controlled starting current and temperature.

Equipped with a programmable software and, thanks to the analogic pressure sensor, the product allows to set the re-start pressure. An ideal solution which allows to reduce or remove the need of a expansion tank

24%

**LESS ENERGY CONSUMPTION
COMPARED TO A STANDARD PUMP**

FEATURES

- high efficiency asynchronous single-phase motor
- capacitor not stressed in voltage
- uniform and lower motor temperature
- motor power control
- programmable re-start pressure
- no hydraulic losses due to the measuring devices
- voltage and current control
- monitoring of maximum starting current
- elimination of water hammer

PROTECTIONS

- dry-run protection
- air detection in the pump and in the filling cycle
- overload control and overheating motor control
- pump blockage
- overcurrent protection
- power supply control
- system leakage control
- high flow rate and piping failure detection
