

GX ZERO

Submersible Pumps in stainless steel

Construction

Single-impeller submersible pumps in chrome-nickel stainless steel, with vertical delivery port and suction non-return valve. Suction capability up to 1 mm from the bottom. Motor cooled by the pumped water passing between the motor jacket and the external jacket. Double shaft seal with oil chamber. The pump is fitted with a suction non-return valve which, during operation, allows to manually move the pump to several points in the room and draw water up to 1 mm avoiding that the pump loses its priming.

Applications

For clean water containing solids up to 3 mm grain size. For draining rooms or emptying tanks. Extraction of water from ponds, streams or pits and for rainwater collection. For irrigation purposes.

Operating conditions

Liquid temperature up to 35° C.
Maximum immersion depth: 5 m.
Minimum water level 1 mm.
Continuous duty.

Motor

2-pole induction motor, 50 Hz ($n \approx 2900$ rpm).
